

OTS Group teams up with OTI PetroSmart to deliver Automatic Vehicle Identification (AVI) refuelling system EasyFuel+ aimed at helping fleet managers to control costs and eliminate fuel misuse

- **EasyFuel+** combines Automatic Vehicle Identification (AVI) technologies with contactless technologies to automate and secure the refuelling process
- AVI refuelling technology increases speed to refuel and reduces fuel misappropriation and misuse
- **EasyFuel+** now available to fleet managers in the UK

Moreton-in-Marsh, Gloucestershire (9th December 2022) – Fleet operators can now enjoy a more efficient and secure refuelling process thanks to the partnership between **OTS Group** and **OTI PetroSmart**. The two companies have joined forces to provide an integrated solution that encompasses hardware, software and support services under one roof. **EasyFuel+** combines Automatic Vehicle Identification (AVI) technologies with contactless technologies to automate and secure the refuelling process. This will not only streamline the refuelling process, but also reduce operational expenditure by eliminating manual processes and providing quality data for effective fuel consumption management.

After successful rollouts of the AVI refuelling technology around the world, OTS Group and OTI PetroSmart achieved a ground-breaking milestone in the UK's retail sector earlier this year with a successful pilot of **EasyFuel+**, an impressive AVI refuelling system that has revolutionised the refuelling experience of commercial drivers for one of Britain's largest supermarket chains. As a result of this trial, **EasyFuel+** will be rolled out across the chain and implemented in 16 distribution depots.

"I am looking forward to working with Shaun and the team at OTI PetroSmart in delivering this technological advance in vehicle identification for the UK Commercial Fleet Market," said **Steve Gain, Managing Director of OTS Group**. "The flexibility of solutions covering all types of vehicles demonstrated in the recent 'Real World' trial resulted in impressive ROI, enhanced fuel security, faster refuelling times and accurate back-office fuel accounting for all fuel types."

"The success of the recent pilot and can be attributed to the expertise and dedication from both OTS and OTI and we are extremely pleased to be partnering with Steve and Neil as well as the entire OTS team," said **Shaun Ferreira, Sales Director: EMEA of OTI PetroSmart**. "Combining the strengths from both companies will enable proactive fuel management systems with unrivalled support."

For Commercial and Homebase fleet managers who are continually streamlining operations to increase efficiency and save time and money, the fact that OTS Group and OTI PetroSmart are making **EasyFuel+** available to fleet managers in the UK will come as good news.

Businesses that manage large numbers of vehicles and who implement **EasyFuel+** can expect cost savings through reduced waste and improved efficiencies. AVI refuelling technology increases speed through the pumps, putting drivers back on the road faster while eliminating fuel misappropriation and misuse - all of which helps to ensure business efficiency is maximised and wasteful spending avoided.

ABOUT OTS GROUP

With over 50 years' experience in the fuel sector, OTS Group are recognised as leaders in the field. Renowned for their advanced fuel storage systems and turnkey solutions, OTS Group designs and delivers practical answers to complex fuel storage, re-fuelling, distribution, service and maintenance issues. From design to delivery of truck stops and fuel distribution depots, to the provision and servicing of dispensing equipment, to fuel quality and certification, OTS delivers the perfect solution to all your fuelling needs.

OTS Group / Strong ethics, technological approach, high quality products and services, invested in our people.
